Junior SOC Analyst Web App

Exercise Instructions

 **Objective**

Learn defensive security concepts by exploring network monitoring, vulnerability scanning, and firewall management.

 **Step-by-Step Instructions**

- 1 SIEM Dashboard**

Inspect your SIEM dashboard, copy the malicious IP from the critical alerts, and switch to the IP Hunter tab.
- 2 IP Hunter**

Use the IP Hunter to analyze the suspicious IP address identified in the SIEM alerts.
- 3 Escalation**

Let's declare a small incident event and escalate it.
- 4 Firewall**

Block the malicious IP address on the firewall and find out the hidden flag.

 **Need to Start Over?**

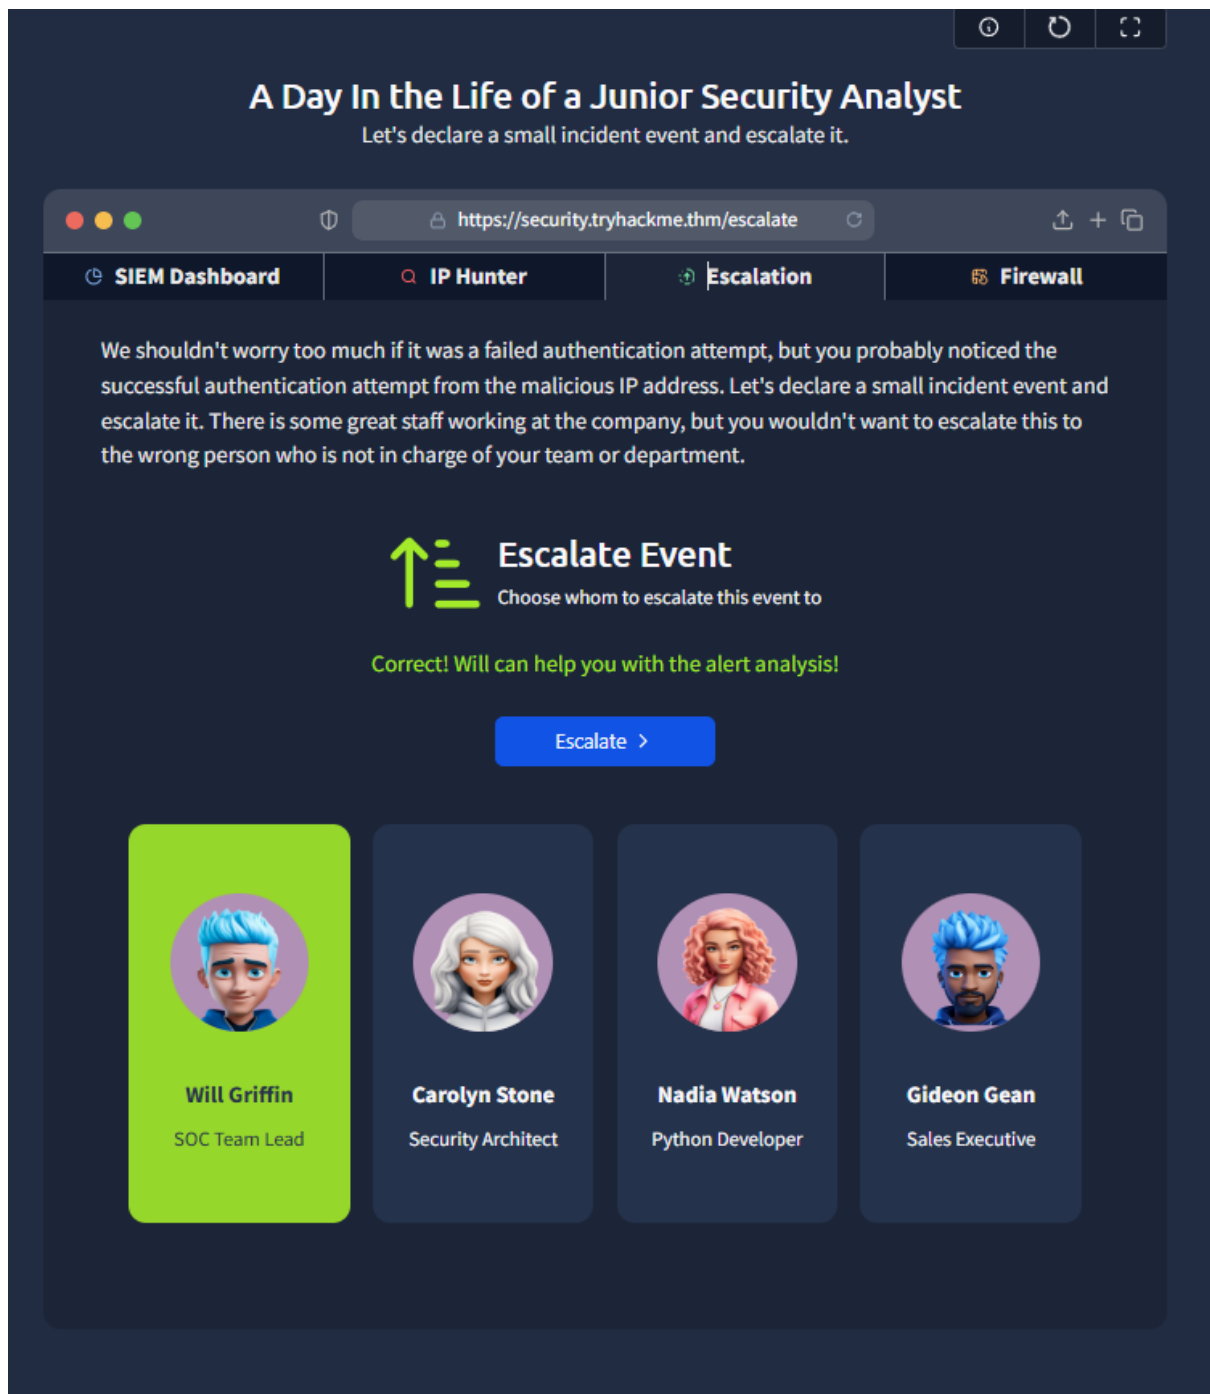

Click the "Reset" button in the top-right corner to restore the initial state of the exercise.

1Q)What was the malicious IP address in the alerts?

221.181.185.159.

Explanation from above picture critical and malicious is may 30 th - 2 have common Ip address **221.181.185.159** so it is the right answer.

2Q)To whom did you escalate the alert with the malicious IP?

Will Griffin

3Q)What message did you get after blocking the IP address on the firewall?

A) Get into the firewall tab

A Day In the Life of a Junior Security Analyst

Block the malicious IP address on the firewall and find out the hidden flag.

Malicious IP address: 221.181.185.159

SIEM Dashboard

IP Hunter

Escalation

Firewall

While your SOC team lead, Will, is analyzing the alert in more detail, you got the permission to block the malicious IP address on the firewall to stop or slow down the attack. Paste the malicious IP, add an optional comment, and block it before it's too late.

FIREWALL BLOCK LIST

Block IP Address

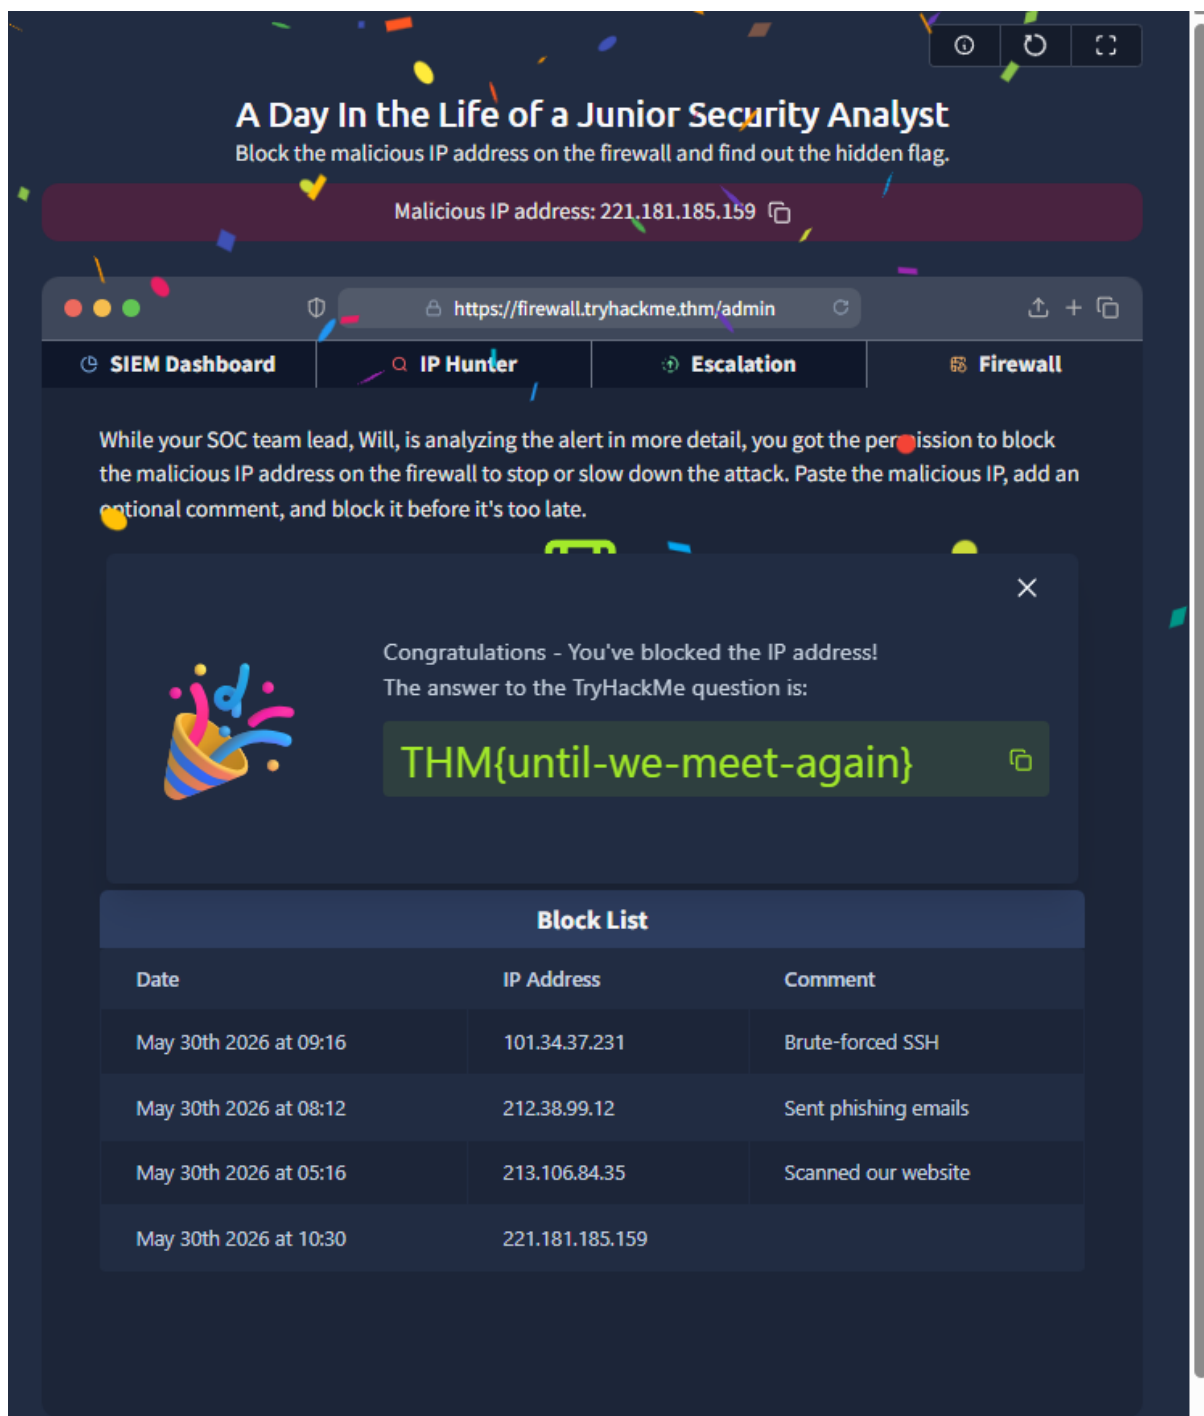

221.181.185.159

Your optional comment

Block IP Address

Block List		
Date	IP Address	Comment
May 30th 2026 at 09:16	101.34.37.231	Brute-forced SSH
May 30th 2026 at 08:12	212.38.99.12	Sent phishing emails
May 30th 2026 at 05:16	213.106.84.35	Scanned our website
May 30th 2026 at 10:30	221.181.185.159	

Enter Ip Address and block IP Address
